

# BUYING GUIDE

## Select the right IV training tools

IV training tools are essential for healthcare education programs, allowing students to safely and effectively practice IV insertion, infusion, and other vascular access techniques. This guide will help you choose the best trainers and supplies by providing options that fit your budget and your teaching needs.

The realistic training arms and hands below are designed to simulate the look and feel of human veins, helping learners build confidence and competence in IV procedures before working with real patients. To browse our full selection of healthcare training tools, visit [nascoeducation.com/health-science](http://nascoeducation.com/health-science).

### Basic IV

Provide students with a realistic way to practice the fundamentals before performing procedures on real patients.
